

The Campus mondial de la mer is France's foremost community of experts in the study and economic development of the ocean

Emmanuelle Dilasser
Project coordinator

Romain Jan
Technical officer

“With the volunteers to take up the challenge, ideas emerged, access to data enabled us to confirm intuitions and the pitch exercise enabled us to work on presentation and argumentation to defend the project. The coaches acted as catalysts to produce results in terms of quantity and quality, and the jury also helped us to think about Ocean Hackathon® next steps.”
