

 TRANSFORM	CITIZENS' JURY ON RESPONSIBLE SMART MOBILITY
---	---

Vision and Aims	Designing better R&I calls for projects and ideas thanks to citizens' contributions and in turn supporting only R&I products and services that are aligned with citizens values, needs and expectations
Target Audience	Citizens
Key Features	<p>In June 2022, a face-to-face Citizens' Jury engaged 24 Lombardy citizens - selected according to specific socio-demographics criteria - to learn, discuss and deliberate during two Saturdays about regional Responsible Smart Mobility, a key theme of the Lombardy Smart Specialization Strategy (S3).</p> <p>At the end, Jurors provided the Lombardy Region with specific recommendations on how to insert responsibility issues like privacy and profiling, digital and economic inclusion, and accessibility in the preparation of a Lombardy Region call for projects on local mobility data-driven services (launched in Autumn 2022).</p> <p>Citizens' recommendations have been inserted as requirements for applicants to be considered in their project proposals and, of course, in the execution of the winning projects.</p>
Achievements & Learnings	<p>A Citizens Jury and other forms of deliberation can meaningfully inform policymakers to design better operational R&I policies (i.e. call for R&I projects or ideas). Useful criteria for selecting projects can emerge from this approach to ensure that the final outcomes generated by the funded project are, from the outset, aligned with societal values and needs. In fact, thanks to the citizens' contributions, selected R&I projects will be "responsible by-design" since they will include citizens' opinions on societal responsibility issues when designing and shaping project results.</p> <p>This approach can be relevant especially for a call for projects/ideas dealing with potential controversial technologies (i.e. AI, genome editing, etc.), in which the inclusion of societal perspectives is fundamental.</p>
Launch Date [& Duration]	Fall 2021 – Spring 2022
Partners/Sponsors	<p>Partners: - Bassetti Foundation</p> <p>- Lombardy Region – Directorate Research and Innovation</p> <p>- Finlombarda</p> <p>Funded under Horizon 2020 TRANSFORM Project (GA 872687)</p>
Further Information	All the information related to the Citizens' Jury are available in the regional portal Open Innovation (in Italian):
